NEW ERA FOR **CYPRUS**

AST week must surely be unique in the history colonial rule. The Belgians handed the Congo the Congolese; became a republic British protectorate of Somaliland has merged with Somalia and won independence.

The most welcome news for the British Commonwealth and, for that 'matter, the allies in the West, however, was the announcement that the British and Cypriot delegates have at last cleared the way for of the Cyprus republic after many months of protracted negotiation.

Years of senseless fighting ended in 1958 at the cost QUARREL: of hundreds of lives on both sides giving rise hope that there would never be a resumption but in months that followed there existed an uneasy truce,

With the conclusion of the London and Zurich agreements the way appeared to be open for final troubled sisland. But Arch-Makarios' intransigence...on...some.of...the major points caused by his own interpretation of the 74 agreements did not help matters.

THAT is now in the past L The last barriers have been broken down and is a tribute to Britain's desire to seek a compromise at extra cost to herself that the final stages have been reached

without further bloodshed. Despite the extreme difficulty and complexity in the later stages, none of the parties to the London and Zurich agreements have seceded from their determination to establish both an independent Cyprus republic sovereign

in the Eastern Mediterranean and underwrite Western defences in the area.

The one-stage ballistic rocket, carrying Courageous and another dog and a rabbit, was successfully launched last month and reached a height of 130 miles. All the animals were reported in good condition.

The total weight of the scientific apparatus, including power sources and the animals was approximately 2,000 pounds

Purpose of the launching was research into the upper layers of the atmosphere and cosmic

INFORMATION

The agency, which said the research programme had been completed, stated that valuable information has been obtained on ionised clouds, which form at high altitudes, the ion composition of the atmosphere and its electrical properties, radiation on the earth and the sun, also new data on the effects on animals in conditions of weightlessness.

distinct from satellites. The dog Courageous-which has been sent up to a height of 280 miles in past experiments made two trips into space in July 1959. In one firing Courageous had another dog for companion, in the other, a dog and a rabbit.

DOCUMENTARY In May this year it was an nounced that a documentary film showing the behaviour of two Russian dogs one of them Courageous in a rocket flight was to be shown shortly.

Tass later quoted Professor Alexander Mikhailov, Director of the Pulkovo Observatory, near Leningrad, as moving he was "amazed" at a single stage rocket being able to lift a payload of over two tons. He hailed the flight as another step on the road to launching a manhed spaceship. Reuter,

Kishi appears to favour Hayato Ikeda, the present Trade and Industry Minister -and Ikeds also has the support of former Premier and political strongman Shigeru Yoshida.

However, other contenders for the Prime Minister's post have joined together to prevent Ikeda from being nominated. Foreign Minister Alichio Fujiyama, a millionaire businessmen and a strong supporter of Kishi's for many years, may be given the Prime Minister's post as a temporary measure. However, some party members would object to this on the grounds that Fujiyama has only been in poli-

tics since 1957. Whoever is named Prime Minister, he will only hold the post for a short time-at least in the first instance.

END OF YEAR It is reported that Government leaders have decided that elections should be held before the end of this year-most likely in September or October-in order to sound out the opinion of the nation on the security treaty.

REPORTING TODAY ON MIAMI, WHERE

Not even the mosquitoes dare put the bite on this man!

THEY took the swamp land; they pushed it through cement mixers; and r they have called it Miami. I think I would have preferred it if they had left it as it was-undrained, unhygienic, and unadorned.

isked bluntly whether he thought that Australian fast bowlers Ian Meckiff and Gordon Rorke throw, Bradman replied; "Whatever I say will give you a headline, so I will content myself with saying that the umpires should be the sole judges,"

Mr Dowling's reply to the question was: "On the official evidence of the men in white, Meckiff has never been noballed for throwing, and the same applies to Rorke,"

Bradman added: "It seems pretty obvious that somewhere along the line a different interpretation of the law has come into being. I have always been brought up to respect the

Tommy cycles to the top -and £200 a week

By RICHARD BERRY

Long before it is finished the Tour de France cycle race has already brought fame to one man.

He is tall, thin, elegant Tommy Simpson who, at 22, is being acclaimed as one of the top English athletes of the year and a potential world-beater.

Simpson has shown that an Englishman can compete on level terms in the French national sport. This has surprised and a little shocked—the French; it is rather as if a team of French cricketers had come to England and held the MCC to a draw.

race and Simpson is the "baby." He was picked after being a professional cyclist for only nine months—the most successful "baptism" any cyclist ever had.

Resigned

Durham-born Simpson started cycling as an amateur when he was 16. He did so well in National Championships that at 18 he competed in the Olympic Games at Melbourne and won a bronze medal in the 4,000 metres. Last year he threw up his job as an engineering draughtsman end went on the Continent as an
